

KHUSHAL TAJNE

JAVA FULL STACK DEVELOPER | JAVA BACKEND DEVELOPER | JAVA DEVELOPER

Hyderabad, Telangana, India

Contact: +91-7558502173

Email: khushaltajnekt@gmail.com

LinkedIn: [linkedin.com/in/khushal-tajne](https://www.linkedin.com/in/khushal-tajne)

Portfolio: portfoliokhushal21.netlify.app

SUMMARY

- Java Backend Developer with hands-on experience in building secure, scalable, and production-ready applications using Spring Boot, Spring Security, and relational databases. Skilled in REST API development, transactional management, and clean architecture patterns. Strong understanding of microservices concepts, authentication mechanisms, and performance optimization.

EDUCATION

Bachelor of Technology in Information Technology

Kavikulguru Institute of Technology and Science,
Ramtek, Maharashtra, India

7.47 | December 2021 – July 2025

XII | G.B.M M Junior College

87.50 | 2021

X | Dnyandeep Vidya Niketan

75.00 | 2019

SKILLS

- Languages:** Java 8+ (Lambdas, Streams, Functional Interfaces, Optional), JavaScript, C, HTML, CSS
- Frameworks & Backend Technologies:** React, Spring Boot, Spring Framework (Core, MVC, DI, AOP), Hibernate, Spring Data JPA, Servlets, JSP, JDBC, RESTful Web Services, JUnit
- Security:** Spring Security, JWT Authentication, Role-Based Access Control (RBAC)
- Databases:** MySQL, Oracle, SQL (Joins, Subqueries, Aggregations), MongoDB, PostgreSQL
- Java Core:** OOPs, Collections Framework (List, Set, Map, Stream API), Multithreading, Exception Handling, Generics
- Cloud:** AWS (EC2, S3, RDS)
- Tools & Platforms:** Git/GitHub, Maven, Apache Tomcat, Eclipse, VS Code, Postman, SQL Plus, Swagger, Insomnia, Docker
- Concepts:** MVC Architecture, SDLC, Debugging, Problem Solving, Microservices, API Integration

EXPERIENCE

PHN TECHNOLOGY – WEB DEVELOPMENT INTERN

03-March-2023 To 06-June-2023

PUNE, INDIA

- Developed and maintained responsive web pages using HTML, CSS, and JavaScript.
- Designed user-friendly interfaces ensuring compatibility across multiple devices and screen sizes.
- Improved website layout and responsiveness using modern CSS techniques.
- Collaborated with the team to implement UI changes and fix front-end issues.
- Tested web pages for cross-browser compatibility and performance.

CERTIFICATES

THE COURSE OF ALPHA (DSA WITH JAVA)

Apna College

JAVA FULL STACK

NareshIT

PROJECTS

Personal Goal & Task Monitoring System

Tech Stack : React.js, Spring Boot, Spring Data JPA, Spring Security, JWT, PostgreSQL, JPA, REST APIs

- Developed a full-stack goal tracking application using React, Spring Boot, JWT, and PostgreSQL for scheduling and monitoring yearly, monthly, and daily targets.

Key Responsibilities and Features:

- Designed and Developed 20+ REST APIs using Spring Boot improving backend performance by 30%
- Implemented JWT-based authentication and authorization using Spring Security.
- Built role-based access control ensuring user-specific data isolation.
- Developed frontend using React.js with protected routes and API integration using Axios.
- Created goal scheduling system (Yearly, Monthly, Daily targets).
- Implemented CRUD operations for goals, sub-goals, and notes.
- Designed normalized PostgreSQL database schema for Users, Goals, Targets, and Notes.
- Used Spring Data JPA for database interaction and transaction management.
- Implemented global exception handling using @ControllerAdvice.
- Tested APIs using Postman and ensured proper validation.

Bank Management System – Enterprise Level Spring Boot Application

Tech Stack: Spring Boot, Spring Security, Spring Data JPA, MySQL, REST API, Hibernate, HTML, CSS

- Built a secure banking application using Spring Boot and MySQL implementing deposit, withdrawal, and fund transfer with role-based authentication and transactional management.

Key Responsibilities:

- Designed and developed RESTful banking APIs using Spring Boot.
- Implemented secure authentication and authorization using Spring Security.
- Developed core banking features including deposit, withdrawal, and secure fund transfer operations.
- Applied Spring Data JPA (Hibernate) for database interaction and ORM mapping.
- Designed normalized MySQL database schema for Users, Accounts, and Transactions.
- Implemented DTO pattern for secure data transfer between layers.
- Applied Hibernate Validator for input validation and data integrity.
- Implemented global exception handling using @ControllerAdvice.
- Ensured data consistency and atomicity using @Transactional.
- Followed layered architecture (Controller → Service → Repository) for maintainability and scalability.
- Tested and validated APIs using Postman.

E-Commerce Web Application

Tech Stack: Java, JSP, Servlets, JDBC, MySQL, HTML, CSS

- Designed and developed a scalable full-stack e-commerce platform with separate Admin and Customer modules, focusing on performance optimization and clean architecture.

Key Responsibilities:

- Designed and developed the complete e-commerce system using Java, JSP, Servlets, and MySQL.
- Implemented secure user authentication with session management for Admin and Customer roles.
- Developed product management module including product listing, add/update/delete operations.
- Built inventory tracking system to manage stock availability in real-time.
- Created responsive user interfaces using HTML, CSS with dynamic product cards and search filters.
- Implemented shopping workflow including product browsing and structured navigation.
- Optimized SQL queries and backend request handling to reduce page load time by 50%.
- Improved overall user engagement by 30% through UI enhancements and workflow optimization.
- Applied MVC architecture for clean separation of business logic, presentation layer, and database operations.
